Village Vet celebrates 18 months of partnership with Wood Green Animal Shelters

Village Vet has now been working with Wood Green for approximately 18 months. Village Vet provide a full veterinary service for the Shelter based in North London. Wood Green Animal Shelters are a national animal welfare charity that has been taking in lost and unwanted animals, and finding them loving new homes since 1924. The Shelter based in North London has recently had a complete refurbishment. This was the first time the Shelter had been redeveloped since 1974 and, in order to maintain its first class care and high standards in animal welfare, it was time to make some improvements. The new improved Shelter in London now has a cattery enabling the care and re-homing of cats.

On Monday 18th February the very first new resident of the cattery arrived. 'Puss Puss', as she has been named by staff, was brought in by a local resident who had found her regularly wandering around her garden. She noticed that her stomach was gradually beginning to swell and decided to bring her into Wood Green Animal Shelters. On arrival it was found that 'Puss Puss' was in fact

expecting kittens and at the time of writing this she was due anytime.

Wood Green Animal Shelters are not eligible for Government or Lottery funding and so rely solely on the support of the general public through regular donations. If you would like to make a donation to help Wood Green continue to care for the thousands of animals they care for each year visit the website at www.woodgreen.org.uk or call 08701 90 40 90.

Village Vet sets standards in care of heart cases

At Village Vet we have a team of vets with skills that far exceed the norm. We also have experts and Specialists whose extra knowledge and skills we can call upon, should they be required. One such Specialist is Nicole Van Israël. Nicole is a European Veterinary Diplomat in the field of Cardiology. She has lectured and published widely in the area of cardiorespiratory medicine and travels from her home in Belgium to see cases at our centres in Highgate and Cambridge. In human medicine, most doctors are able to diagnose and treat heart problems adequately - but if you want to go the extra mile to be sure that the best possible treatment is taken, and the right diagnosis is made, you see a specialist. At Village Vet the same applies to your pets; Nicole is available to offer such a service to Village Vet cat and dog patients. If your pet has recently been diagnosed with a heart problem, or already on a course of heart treatment, then you might be interested in this service - talk to our vets today to see if your pet would benefit from the extra reassurance provided by Nicole.
